NewGen findings

- the international orientation of young makers is often found digitally
- tools and ways to find physical mobility are lagging behind this digital orientation
- Demand among makers for collaborative projects, and residencies is high
- artists emphasize multidisciplinary orientation and learning new skills --> form follows function!

DutchCulture | 2023

- Growing and solidifying community of young makers
- peer-to-peer advise
- sharing more (Embassy) open calls with this active group
- 3 co-created meet-ups planned in 2023
- more visibility at academies and arts schools
